

# ADVANTAGE CONVERTING

Advantage Converting is a veteran manufacturing company. From R&D to scaled production, we can make your design a reality. We're creative thinkers. We're problem solvers. And with over 40 years of expertise in precision die cutting, slitting and laminating, we're the team to tackle your toughest challenges.

ISO 13485:2016 Certified

## MEDICAL EXPERTISE      CONVERTING SERVICES

### Advanced Wound Care

To help provide advanced, delicate treatment to wounds, Advantage Converting specializes in advanced wound care applications, including manufacturing intricate dressings with low-trauma, pressure-sensitive adhesives. These bandages provide extended, secure, and breathable protection.

### Devices & Disposables

Common medical care often involves unique, sometimes single-use devices with disposable parts. Advantage Converting manufactures components for uses such as insulating and sealing components in panels, monitors, and LCDs; as well as bonding assembly adhesives for device-assisted drug delivery.

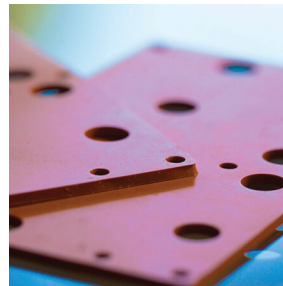

### Microfluidics

Many diagnostic tools and devices test minute amounts of biological or environmental samples. To help build these devices that handle nanoliters of fluid, Advantage Converting manufactures integrated components for uses such as fluid transport and specific biosensor layers.

### Wearables

Advantage Converting manufactures flexible components for both short and long-term wearables, leveraging our knowledge of adhesives to create stick-to-skin materials that avoid trauma and reduce irritation and risk of infection.

### Custom Die Cutting

From initial design through final production, we can convert the most complex custom die cut projects with our cutting-edge equipment and techniques.

### Clean Room Manufacturing

With designated clean room equipment and strict procedures, we ensure the highest quality and cleanest manufacturing for your most sensitive conversions. Our climate-controlled clean rooms are ISO 14644 certified.

### Laminating

Whether adding adhesive to a substrate, introducing a liner to a pressure sensitive product, or making a multi-laminated package, we can meet your converting requirements every time.

### Slitting & Rewinding

With state-of-the-art slitting equipment and raw materials expertise, we are a recognized leader in precision slitting of pressure sensitive and non-pressure sensitive products.

# ADVANTAGE CONVERTING

## WHAT WE'LL CREATE TOGETHER

From start to finish, Advantage Converting looks forward to working with you! When we put our creative minds together, there's no telling what we can accomplish. We collaborate with you at every stage in our process, from engineering and prototyping all the way through to packaging and distribution.

## OUR PROCESS

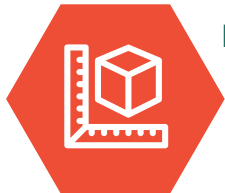

### BUILDING RELATIONSHIPS

Our customers are our lifeblood. From our initial consultation, and through each step of the process, we value every opportunity to learn about you, your business, and your challenge

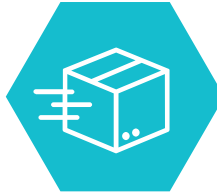

### QUALITY CONTROL

With over 40 years of experience, we incorporate the uppermost quality standards and unparalleled process management from initial consultation to final delivery.

### ENGINEERING & PROTOTYPING

Our highly skilled R&D team collaborates with your top engineers on your most difficult design challenges.

### PACKAGING & DISTRIBUTION

We utilize our broad logistical knowledge and industry resources to ensure we meet your packaging and distribution requirements, regardless of type and scope.

### MANUFACTURING

To meet your quality, cost, and delivery expectations, we use our comprehensive capabilities, from basic assembly to the highest levels of automation and clean room expertise.

### SERVICE & SUPPORT

Our customer service team is committed to providing you highest-quality support and satisfaction for every inquiry and request, whether it's broad or specific, about engineering, manufacturing, or shipping.
